ON PREMISE SOLUTION

- One time purchase
- On-premise security tailored to customer's needs

HOSTED SOLUTION

- Monthly payment based on number of conference rooms.
- Secured within Zultys' state-of-the-art data center facility

You control it!

MXmeeting is a web-conferencing platform that fully integrates with the Zultys Unified Communications client application. You can launch a multi-party web-conference with a touch of a button from your Mac or PC. The feature-rich MXmeeting integrates into your network and allows attendees to join a collaborative web conference without requiring special software to be installed on their computer. Click to start an interactive Web Conference with 30-point Video, seminar or remote desktop support with real-time webcam video.

You can integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal web page, or windows based applications such as audio conference or CRM systems.
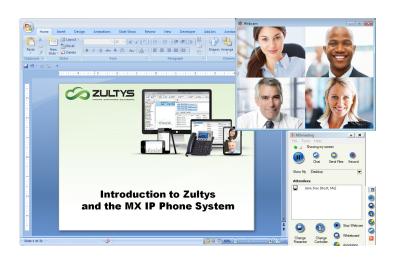

If you deploy it as an on premise appliance. It can be placed outside, behind or in the DMZ of your Router/Firewall. Administration of the system remains the same regardless of whether you choose a hosted of a on-premises deployment option

UNIVERSAL ATTENDANCE
Anybody can join the meeting

The amazing Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required. The attendee is "view only" and can see the presenter's screen in a browser with speed similar to the fully interactive client attendee that requires a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast – just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.

MXmeeting's licensing is not tied to any particular user, meaning you don't have to buy license for every employee in the company, if only a limited number will use the application at same time.

Introduction to Zultys
and the MX IP Phone System
