Summit Hospitality Suite

# Take guest services to the Summit with exclusive Hospitality feature set

The Vertical Summit™ is the only communications platform with a dedicated hotel/ motel feature set ideally suited for boutique, small and medium-sized properties. Now you can integrate your communications system directly with guest services for more streamlined, cost-effective administration and operations, from the front desk to the back of the house.

Activated with a separate license, the Summit Hospitality Suite is accessible through an exclusive property management interface and includes standard features such as room status, wake-up calls, check in/out and more.
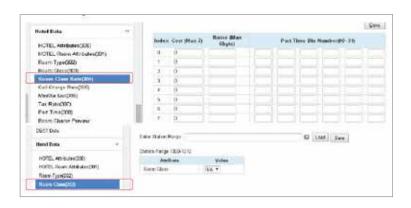

Cost Effective, Simple and Easy to Use

The Summit's Attendant Hotel property management system (PMS) is simple to set up and use, and can be integrated with Fidelio and other existing systems for even greater functionality and cost savings.

Views can be filtered by check-in date, room status, DND, room rate and more with the click of a mouse. At-a-glance room reservation management provides 30-day Room Status information, is easily searchable by available rooms, and automatically generates guest emails with their reservation confirmation.

Room Monitoring Window

Reservation Wwindow

With the Summit Hospitality Suite, you can assign individual room rates from among 20 different options. In addition to room rates, bar, phone and other charges are automatically included in the Total Room Charge Bill, which can be generated through the Summit's PMS , a third-party PMS, or third-party billing solution.
