

# STAFFALERTER K-9Saver

Most dog owners know that you can't leave a pet in a hot car. Temperatures can rise to dangerous levels in just minutes, putting your dog at risk of heat stroke. Simply cracking a window is not going to help.

You need to know the conditions your pet is experiencing. K-9Saver from PM Power Products, LLC. does just that. K-9Saver monitors any space for temps above 75F, then alerts you via text, call.

In 2015, the Green Bay Press Gazette found that between 2011 and 2015, at least 46 police dogs throughout the U.S. died from heat while inside their handler's cars.

Don't let this tragic situation claim a pet you love. Let K-9Saver be the guardian your pet needs. In addition to temperature reports, K-9Saver reports all the conditions below.

## Reporting Mode Options

**Scheduled Timing Reports** - sent at preset time intervals

**Low Power Report** - Alarm when internal battery is low

**Power Saving Report** - Long Standby time

**Continuous Report** - Emergency Tracking

**Check-in Report** - Alive check, does not send location info

**Movement Report** - When device senses movement

**Removal Report** - When device is removed from mount

**Temperature Report** - When temperature excursion occurs

**Light Report** - When device senses light (opening of box)

All reports are sent real-time to the K-9Saver application on the handler's smart phone
