

DATA SHEET

Polycom® RealPresence® Mobile for Apple® iOS

Expand the reach of your video network to the mobile user, and interact face-to-face with your colleagues and customers from wherever you are

Imagine this scenario: You access your email one moment, and take a video call from Germany at the start of the hour. After the call you take a quick coffee break where you see the latest sports scores. While waiting for a meeting, you look at updates to the floor plans of your new office. Before lunch, you call in to a video meeting with your team members who are on various unified communications (UC) devices and conference rooms spread around the country. For your lunch break, you go to the dentist. In the waiting room, you sit back and listen in real time to the quarterly business review. All this is handled on your favorite UC device: your iPad® or iPhone®, now empowered with a standards-based video application, Polycom® RealPresence™ Mobile for Apple® iOS software.

Polycom RealPresence™ Mobile software is mobile video client software with “meeting-on-the-go” ability. With the tap, touch, or flick of a finger, colleagues connect to one another. Not just with voice, but also with full, standards-based video that provides an engaging, realistic experience. With video conferencing access right on your iPad or iPhone, you easily move from a video meeting, to your daily calendar, to your email, to any one of hundreds of other applications.

Quality is important in business communications. Video calls with the RealPresence Mobile solution are as reliable as calls you make from a conference room. Polycom Constant Clarity™ advanced technologies provide the quality of service necessary to operate in today’s wireless environments. Unlike competitive applications that struggle to work in bandwidth-challenged areas, RealPresence Mobile software helps ensure call quality. Enterprise users appreciate that their conversations are secure and confidential through the use of encryption technologies.

As a standards-based application, the RealPresence Mobile solution seamlessly connects to the more than two million video conferencing systems deployed throughout the world. When combined with the Polycom® RealPresence™ Platform solutions, you make multiparty calls easily, fully participating in the discussion, and even seeing content shared in the meeting. Your ideas, thoughts, and contribution are heard, securely, regardless of your location.

Efficient, secure, innovative, standards-based, and high-quality collaboration: These define the RealPresence Mobile. Using the free download on your iPad® or iPhone®, you easily link a video-enabled network of business devices. The application can be added to existing networks without the loss of administrative controls necessary for serious business applications.

Benefits

- **Easy to use** – Connect immediately with colleagues across the enterprise with a simple touch
- **Premier quality** – See every expression, hear every nuance of the conversation and convey your message
- **Mobility** – Stay connected whether in the office or on the road
- **Confidence** – Use mobile video communications from bandwidth-challenged locations with Polycom Constant Clarity™ protection
- **Valuable** – Utilize the full potential of today’s latest technologies; take your mobile device to new levels of added value with a simple application
- **Cost-effective** – Centralized deployment, management, and monitoring facilitates expansion of the video-enabled network
